Summary

Cybersecurity enthusiast ranked in the top 7% on TryHackMe with hands-on expertise in web application penetration testing (VAPT). Skilled in identifying OWASP Top 10 vulnerabilities and building security automation tools using Python and Bash. Strong experience in real-world attack simulations and remediation.

Technical Skills

Offensive Security: Web App Pentesting, Network Auditing, Privilege Escalation, Wireless Security
Vulnerabilities: SQL Injection, XSS, IDOR, SSRF, Broken Access Control
Tools: Burp Suite, Nmap, Metasploit, Wireshark, SQLmap, Nessus, Gobuster
Scripting: Python, Bash, Secure Code Review (HTML, JavaScript)
OS: Kali Linux, Parrot OS, Windows

Projects

VulnScanner (Python Security Framework)

- Developed automated scanner for XSS and SQL Injection detection
- Improved performance by 40% using multithreading

Advanced Recon Suite (Bash Tool)

- Automated reconnaissance (Nmap scans, subdomain enumeration)
- Reduced manual effort by 70%

ClipMonitor (Endpoint Monitoring System)

- Built Python tool to monitor clipboard activity
- Helped detect potential data leaks

Practical Experience

Self-Practice / Virtual Cybersecurity

- Completed 50+ hands-on labs on TryHackMe
- Performed vulnerability assessments on test applications
- Practiced real-world exploitation and reporting

Education

Master of Computer Applications (Cyber Security) Parul University, Vadodara	2025 – Present
Bachelor of Computer Applications TMV University, Mumbai CGPA: 7.55 (A+)	2025

Certifications

- Cybersecurity Career Starter Certification – Hack & Fix Academy
- Endpoint Security Specialist – Cisco Networking Academy
- Nmap Mastery Certification (NSE)
- Web Hacking for Beginners – Udemy

Achievements

- Ranked in Top 7% globally on TryHackMe
- Completed 50+ cybersecurity labs
